

One of the greatest strengths of nurses is their capability to find practical solutions for the problems they or the people they care for encounter.

Most nurses are not so good at taking credit for it.

On behalf of the EAHAD Nurses Committee, we started to collect great ideas and/or practical solutions to help our patients with a bleeding disorder. We started by filling the toolbox with existing material found on the internet, from the World Federation of Hemophilia & Haemnet, as well as examples from different haemophilia treatment centres.

We invite you to share your own ideas by sending us an email at info@eahad.org, so it can be used by all nurses. Let's create a regularly updated, practical

Bleeding Disorder Toolbox

We look forward to all your ideas!

Maria Hytti and Nanda Uitslager

PS

As the EAHAD nurses committee is responsible for the content, the decision to post items is theirs.
